Simultaneous Recording and Playback

24 input (16 analog/8 IP) and 40 input (32 analog/8 IP) Hybrid system. Each DVT/NVR server is expandable up to 64 IP cameras

Digital PTZ

Digital PTZ feature adds PTZ-like functionality to all cameras (analog and IP) in live and recorded mode. Digital zoom preset allows for quick zooming on selected areas.

Multiple Zoomed Windows From Each Camera

NVT-4000 software supports simultaneous viewing of multiple cameras full field of view in reduced resolution mode while also viewing full resolution zoomed windows from the same cameras (transmitted as separate video streams), as well as instantaneous multi-user electronic pan, tilt and zoom.

Multiple Picture Qualities and Resolutions

You can set each camera individually for resolution, compression, frame rate and recording events.

Multi-Zone Motion Detection

The systems support whole screen or user defined areas of motion detection, with several detection areas for each camera.

Remote Access

This system provides for a seamless management of analog and IP cameras from client interface on any PC.

Scheduled Video Recording

Operate with 5 different recording modes, including alarm recording, scheduled recording, motion recording or combinations of each. Each camera and mode can be defined hourly, daily, or weekly.

Supports Megapixel Cameras

This system is integrated with Arecont, ACTi, IQeye, Sony, Panasonic and Axis megapixel cameras.

Remote System Administration

You can remotely connect to the server through multiple network configurations, including LAN/WAN/ISDN or PSTN. Then navigate and operate all the system functions as if you were at the main system. The interface is the same remotely as it is at the server.

System Watchdog

In the unlikely event system freezes, the system's watchdog feature will automatically reboot the system.

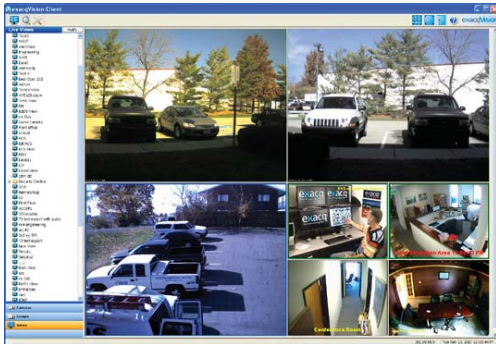

Multiple Audio Channels

Monitor live audio, record, play back and back up audio on one or multiple cameras.

User-Friendly Operation

Settings and menus are designed for non-experts, so anybody can navigate the system without spending days learning how to operate it. Multiple monitor (client) display--drag and drop cameras.

HYBRID/NVR Software Features

The AdSec DVR/NVR-4000 Hybrid Network Video Recorder ("NVR") system provides seamless integration and recording of both analog and IP video surveillance cameras on a single 2U rackmount server.

The powerful, yet easy to operate client user interface installs on any standard PC and can connect to multiple AdSec 4000 series servers creating a virtually unlimited amount of cameras and protection. Each Hybrid NVR server includes up to 32 analog inputs and includes 8 IP camera licenses which can be expanded to 64 IP cameras per server.

- Intuitive user-interface
- Multi-monitor support
- SmartSearch
- Multi-camera recorded video playback
- Pre/Post alarm recording
- Event notification
- Quick DVD export
- Text insertion / search
- Activity log
- Privacy Video Block
- Complete Remote Administration
- Graphic search display
- Simultaneously record, review and administrate
- Audio from supported IP cameras
- Powerful, easy to use, camera grouping and viewing options
- Touring
- Soft Triggers
- Image Cropping
- Supports growing list of IP Cameras including Axis, IQinvision, Panasonic, Sony, Arecont Vision, ACTi, CBC America Corp., Vivotek & GE.

Remote Monitoring

- Full remote operation from most PCs
- All DVR/NVR-4000 systems are scalable across a network and can be accessed from a single client.
- Multiple monitor (client) display allows to drag and drop cameras from multiple clients
